

**Your pet's oral health is important to us.
That's why we offer free dental exams that
include a written estimate for you to review.
Here's what's included:**

- ▶ **Full professional dental prophylaxis** includes ultrasonic scaling and polishing, full-mouth dental x-rays, and extractions (if needed), all under general anesthesia.
- ▶ **Pre-anesthetic bloodwork** is done to be sure your pet can be safely anesthetized.
- ▶ **Dental cleaning** is performed by a certified technician, and, if any extractions are needed, one of our doctors handles the procedure. In addition to standard dental cleanings we also offer dental restorations and bonding.
- ▶ **Dental Technology**
Employing the latest dental equipment, such as our radiography unit, high-speed drill and ultrasonic scaler/polisher combo ensures your pet gets the best treatment.

Please talk with any of our doctors to decide what is the best course of treatment for your pet.
